CITADEL CAPITAL
STRATEGIC ASSETS GROUP

Why This Makes Sense

This aircraft is not a luxury acquisition.
It is infrastructure.

THE OBJECTIVE

A high-flexibility executive mobility platform enabling rapid movement between Auckland and Christchurch — compressing schedule friction, executive downtime and commercial airline dependency into a single controlled asset under direct operational command.

A MATERIALLY REDUCES

- Schedule friction
- Executive downtime
- Overnight travel drag
- Commercial airline dependency
- Project oversight latency

B MATERIALLY INCREASES

- Same-day capability
- Partner coordination
- Project responsiveness
- Executive efficiency
- Operational reach

C MISSION PROFILE

- Auckland ↔ Christchurch
- Auckland ↔ Wellington
- Queenstown access
- Investor & site movement
- Family & executive mobility

D PLATFORM RATIONALE

- Turbine reliability
- Manageable acquisition cost
- Efficient operating economics
- Owner-pilot pathway
- Lower complexity than TBM / Epic

AIRCRAFT PROFILE

The Platform

A pressurised single-engine turboprop configured for executive transport — selected for turbine reliability and operating economics matched precisely to the New Zealand mission profile.

TECHNICAL OVERVIEW

Aircraft	Piper Meridian PA-46-500TP
Registration	ZK-FTP
Base	Dairy Flat Aerodrome
Configuration	Executive Turboprop
Engine	Pratt & Whitney PT6A
Seating	5 – 6
Cruise Speed	~260 KTAS
Typical Range	~1,000 nm practical
Primary Mission	AKL – CHC executive transport

MILSPEC EXECUTIVE CONCEPT

A Restrained Military Identity

The exterior concept references mid-century military aviation without pastiche — a satin drab finish, disciplined markings and a single institutional mark. Quiet capability, not decoration.

FINANCING STRUCTURE

100% Acquisition Structure

OPERATING ECONOMICS

The Annual Cost Base

FIXED COSTS	ANNUAL
Financing	\$159k
Pilot / Instructor	\$125k
Insurance	\$20k
Hangarage	\$24k
Compliance / Annual	\$30k
Miscellaneous Fixed	\$15k
TOTAL FIXED	\$373k

VARIABLE COSTS	PER HOUR
Fuel	\$420
Engine Reserve	\$220
Maintenance	\$140
Propeller Reserve	\$45
Miscellaneous	\$75
TOTAL VARIABLE	~\$900 / hr

TOTAL ANNUAL OPERATING COST

~\$740k

TRUE TRANSPORT ECONOMICS

Auckland ↔ Christchurch

400

ANNUAL UTILISATION
Planned flight hours per year

\$1,850

TRUE HOURLY COST
Fully-loaded, all-in basis

\$3,000

COST PER LEG
~1.6 hr AKL-CHC sector

\$5,900

RETURN TRIP
Same-day rotation, both sectors

ANNUAL OPERATING

\$740k

÷

UTILISATION

400 hrs

=

TRUE HOURLY COST

\$1,850

×

SECTOR TIME

1.6 hr

=

COST PER LEG

\$3,000

PASSENGER ECONOMICS — 4 PAX AVERAGE

\$740

PER PASSENGER — ONE WAY

\$1,480

PER PASSENGER — RETURN

THE CORRECT BENCHMARK

The aircraft should not be measured against economy airline fares. It is benchmarked against the true cost of friction:

- Lost executive productivity
- Hotel nights & schedule rigidity
- Delayed project response & same-day site rotation

PARTNER OFFSET MODEL

Christchurch Partner Syndication

The platform creates the capacity to partially offset operating cost through disciplined utilisation by Christchurch-based development and investment partners requiring regular Auckland access — without compromising primary executive availability.

POTENTIAL STRUCTURES

- 01 Annual membership allocation
- 02 Block-hour allocation
- 03 Strategic syndicate access
- 04 Anchor partner arrangement

UTILISATION ALLOCATION

400 FLIGHT HOURS / YEAR

RECOVERY POTENTIAL

150 hrs × \$1,850 / hr
~\$277k Annual Recovery

EFFECTIVE NET COST

~\$460k
Annual retained operating exposure after partner recovery.

OPERATIONAL RANGE

The Mission Envelope

PRIMARY SECTORS

CHC	Auckland ↔ Christchurch	~1.6 hr
WLG	Auckland ↔ Wellington	~1.0 hr
ZQN	Auckland ↔ Queenstown	~2.0 hr
SYD	Trans-Tasman — extended	Range edge

- OPERATING BASE — DAIRY FLAT
- PRIMARY DESTINATION NODE
- RANGE BAND — 300 / 600 NM

A practical ~1,000 nm envelope places the entire national network — and the South Island development corridor — within a single same-day operating radius.

PILOT & TRAINING MODEL

Integrated Pilot & Training Platform

A DUAL-PURPOSE ASSET

The aircraft is structured as both an executive transport asset and a controlled training environment — a full-time pilot and instructor anchors a disciplined SOP culture while supporting a deliberate owner progression pathway toward eventual owner-operator capability.

THE PLATFORM SUPPORTS

- Executive transport
- Structured IFR pathway
- Operational readiness
- Owner competency development
- Turbine familiarisation
- Insurer-aligned discipline

OWNER PROGRESSION PATHWAY

This is not a luxury purchase. It is executive infrastructure.

THE PLATFORM MATERIALLY ENHANCES

- Operational responsiveness
- Executive flexibility
- Inter-city project oversight
- Same-day capability
- Strategic mobility

FOR CITADEL'S OPERATING PROFILE

The aircraft functions as a force multiplier — converting travel from a constraint into a controlled instrument of strategic execution.
